

Add EnduraLifeDF™ to revive your soil and EnduraFeed™ to stimulate the microorganisms with formulated food sources. EnduraLifeDF enhances soil productivity and plant growth through a robust group of microorganisms, replenishing your soil while EnduraFeed adds energy to microbes to support the important microbe-encouraged plant benefits. EnduraLifeDF increases N, P, K soil availability and supports plant growth and health.

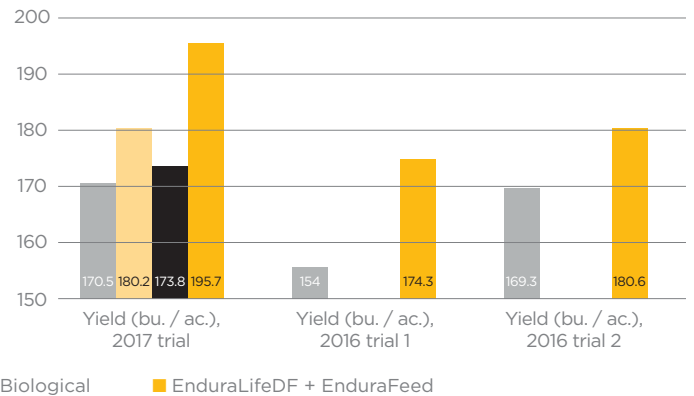

THE OBSERVABLE VALUE OF REVIVING YOUR SOIL

In a 2017 research trial¹ and two trials² in 2016, EnduraLifeDF combined with EnduraFeed showed significant benefits. The increased N, P, K availability generated through EnduraLifeDF anaerobic and aerobic microbes sets plants up for strong growth.

Trail Data, Moisture (%)

Trial Data, Yield (bu. / ac.)

¹2017, in-furrow, corn, conventional till, 20 inch rows, 34K spa, 5.7 soil ph

²2016, in-furrow, corn

THE VALUE OF BIOLOGICALS AND BIO-STIMULANTS

Microorganisms

Biologicals or microorganisms are living single cell or multi-cell colonies of organisms that play a beneficial role in soil and ultimately, in plant growth. Among the most important of many roles microorganisms play, they:

- Provide nitrogen fixation
- Decompose residue
- Suppress disease organisms
- Release important nutrients for plant uptake

INGREDIENTS & DIRECTIONS FOR USE

EnduraLifeDF Soil Amending Ingredients

| | |
|-----------------------------|---------------------------|
| Bacillus Mucilaginosus..... | 1.3 x 10 ⁸ CFU |
| Bacillus Subtilis..... | 8 x 10 ⁷ CFU |
| Bacillus Megaterium..... | 4 x 10 ⁷ CFU |
| Bacillus Simplex..... | 4 x 10 ⁷ CFU |
| Mycorrhizal Fungi..... | 50,000 ppg |
| Amino Acids..... | 15.0% |

EnduraLifeDF Directions For Use

For agricultural / professional and home garden / noncommercial use.

Application: In-furrow, 2x2

Rate: Row Crops - 0.85 oz. / acre in-furrow

Mixing instructions: Mix 8.5 oz. packet in 1.25 gal. of water, agitate

EnduraFeed Active Ingredients

| | |
|---------------------|-------|
| Manganese (Mn)..... | 0.05% |
|---------------------|-------|

Derived from: Manganese Sulfate, Kelp and Sugars.

WARNING: Contains Manganese. Do not use on Manganese sensitive crops. Use only according to manufacturer's directions.

EnduraFeed Directions For Use

For agricultural / professional use.

Application: In-furrow

Rate: 1 pt. / acre

Always read and follow label directions. Use in accordance with recommendations of a qualified individual or institution or an approved nutrient management plan.
